2018 Year in Review

Thank you for your support!

We had fun participating in the Halloween Read at Stephen F. Austin Elementary in Gregory.

GCGV employees and their families participated in a beach cleanup at Sunset Lake in Portland.

In 2018, the Gulf Coast Growth Ventures project reached a number of key milestones, including the formation of the GCGV joint venture and the receipt of the project’s wastewater permit. As the project progresses, we continue to work with our local community and remain dedicated to the commitments of our Good Neighbor Program.

In 2018, GCGV held 73 meetings with local residents, educators, elected officials and civic organizations. The project also held four meetings with the Project Construction Advisory Group, a panel of local leaders, educators, law enforcement officials, business owners and near neighbors.

We remain committed to communicating with local residents and facilitating open dialogue as we move forward.

Project Update

Last year marked the creation of the Gulf Coast Growth Ventures joint venture between ExxonMobil and SABIC. The formation of the joint venture represents a significant business milestone that allows the two companies to continue advancing the GCGV project. The project continues to advance through the permitting phase and in July 2018 received its wastewater permit.

Throughout 2018, Wood PLC continued early site work, and its subcontractor Bay Ltd. performed civil and site maintenance work. Construction work beyond these early activities will not begin until environmental permits have been received. The plant could be operational in late 2021.

In late 2018, GCGV began work on a dock and heavy haul road. The project will use both to transport large facility components (modules) and other equipment from the dock to the project site, reducing impact on local roads.

PROGRESS:

- GCGV has spent more than $162 million with local vendors and contractors.
**Residential Property Price Protection Program**

In January 2018, registration for the Residential Property Price Protection Program opened. The program is an opportunity for residential property owners nearest our proposed facility to secure a guaranteed sale price for their property. The GCGV project hired Community Interaction Consulting, Inc., a group of real estate experts, to administer the program.

**PROGRESS:**
- There have been more than 1,100 matches with jobs listed in the GCGV Workforce Solutions Database.
- GCGV awarded $54,000 in scholarships to 17 Del Mar College process technology students. These scholarships deliver on our commitment to help prepare the local workforce for jobs with the facility.
- The project donated $100,000 to the San Patricio Workforce Development Consortium to support Del Mar College’s career and technical education programs in the county’s high schools.

**2019 OUTLOOK**

GCGV has many more milestones on the horizon, including:

1. The addition of more local residents and businesses to our growing project team
2. Project update briefings for our local community
3. Completion of the environmental permitting process
4. Completion of the dock and heavy haul road
