Gulf Coast Growth Ventures had an exciting 2019!
We broke new ground in many ways, including the start of construction at the project site, arrival of the first modules and continued implementation of our transformational approach to safety training.

We have collaborated with our community to fulfill the commitments of our Good Neighbor Program. In 2019, GCGV held 30 meetings with local residents, educators, elected officials and civic organizations. We also held three meetings with the Project Construction Advisory Group, a panel of local leaders, educators, law enforcement officials, business owners and near neighbors.

We remain committed to facilitating open dialogue with local residents as we continue through the construction phase.

Thank you for your ongoing interest in our project. We look forward to continuing to be a member of this community.

Sincerely,
Paul Fritsch, GCGV Site Manager

PROJECT UPDATE
In 2019, GCGV received its environmental permits and broke ground to begin construction of a world-class petrochemicals complex. GCGV celebrated this milestone with leaders from the local community, ExxonMobil and SABIC.

GCGV’s contractors completed construction of the module offloading facility and a 5-mile dedicated heavy haul road, connecting the project dock to the project site.

This dock and heavy haul road were constructed to facilitate the transport of equipment and modules to the project site to reduce traffic on local roads during project construction. The first modules arrived in late 2019; module deliveries and transportation will continue intermittently through Q2 2021.

Last year, GCGV also selected Vopak to design, build, own and operate the project’s marine facilities on the La Quinta Channel.

PROJECT STATUS

<table>
<thead>
<tr>
<th>February</th>
<th>Held second open house about construction of the project’s dock and heavy haul road</th>
</tr>
</thead>
<tbody>
<tr>
<td>March</td>
<td>Donated $1.5 million to the Del Mar College process technology lab</td>
</tr>
<tr>
<td>April</td>
<td>Partnered with City of Gregory to provide upgrades to wastewater treatment plant for increased capacity and reliability</td>
</tr>
<tr>
<td>June</td>
<td>Received air permit, marking receipt of all environmental permits and allowing project construction to start</td>
</tr>
<tr>
<td>September</td>
<td>Began project construction</td>
</tr>
<tr>
<td>October</td>
<td>Hosted open house to provide information about project’s heavy haul road and upcoming modular moves</td>
</tr>
<tr>
<td>November</td>
<td>Installed community air monitors as part of GCGV’s Good Neighbor Program</td>

Rep. J.M. Lozano speaks at the GCGV groundbreaking ceremony to celebrate the start of project construction
LOCAL ROOTS, GLOBAL REACH

The Hire Smart – Hire Local initiative was designed to ensure residents in the Coastal Bend region have opportunities to work with GCGV. The initiative focuses on three key areas – construction jobs, permanent jobs and job training – and offers opportunities to submit profiles for construction work, apply for full-time jobs and learn about training opportunities.

To learn more about how you can participate, visit www.gulfcoastgv.com and click “Jobs.”

PROGRESS:
• Hired approximately 300 permanent employees to date, 50% of whom are local to the Coastal Bend
• Donated $1.5 million to the Del Mar College process technology training center in 2019
• Awarded $60,000 in scholarships to Del Mar College process technology students in 2019

AT WORK IN THE COMMUNITY

As GCGV’s team grows, our community involvement is expanding. In 2019, GCGV demonstrated our commitment to the Coastal Bend through volunteer opportunities and charitable contributions, including:

• $448,000 in GCGV charitable donations, including to first responders and hospitals, across the last three years
• $5 million donation by GCGV contractor CKJV to fund a new emergency response and municipal complex in Gregory
• $2 million ExxonMobil Foundation donation to the Texas State Aquarium’s Wildlife Rescue Center
• Volunteer work to assist with refurbishments to a Taft Park parking lot, tennis court and soccer field
• Partnership with the United Way of the Coastal Bend to volunteer with the Purple Door
• Manufacturing team adopted 100 Gregory-Portland ISD students through United Way Angel Tree initiative
• Project site team collected over $20,000 and fulfilled Christmas wish lists for teens in foster care through the South Texas Foster Angels Program

2020 OUTLOOK

There are many milestones ahead, including:
1. The addition of more local residents and businesses to our growing project team
2. Project update briefings for our local community
3. Continued project construction

We look forward to continuing to work together in 2020!
